**Standard Request for Application (SRFA)
Selection of Individual Consultant (National)**

(Time Based)

**Integrated Educational Information Management System (IEIMS) Project

Ministry of Education**

Guidance Notes on the Use of the Standard Request for Application for Selection of Individual Consultants (National)

These guidance notes have been prepared by the CPTU to assist a Client in the preparation, using the Standard Request for Application (SRFA), for procurement of Individual Consultants (National). The Client should also refer to the Public Procurement Act 2006 (Act No 24 of 2006), and the Public Procurement Rules 2008, issued to supplement the Act available on CPTU's website: www.cptu.gov.bd/. All concerned are advised to refer to the aforementioned Act and Rules while participating in any selection process of Consultants.

Individual Consultants shall be employed in accordance with Section 38 of the Public Procurement Act 2006 and Rule 112 & Rule 104(d) of the Public Procurement Rule 2008 for assignments for which the qualifications and experience of the individual are the overriding requirements and no team of staff and no additional professional support are required.

This document shall be used when a Procuring Entity (the Client) wishes to select an Individual Consultant (National) for **assignments for which the qualifications and experience of the individual are the overriding requirement**, for which remuneration is being determined on the basis of the time actually spent by the Consultant in carrying out the services.

Time-based Contracts are recommended when the Scope of the Services cannot be established with sufficient precision, or the duration and quantity of Services depends on variables that are beyond the control of the Consultant, or the output required of the consultants is difficult to assess.

Consultant's remuneration is based on (i) agreed unit rates for the Consultant multiplied by the actual time spent by him/her in executing the assignment, and (ii) reimbursable expenses using actual expenses and/or agreed unit prices. This type of Contract requires the Client to closely supervise consultants and to be involved in the daily execution of the assignment.

SRFA (PS4) has been designed to suit the particular needs of procurement within Bangladesh, and has four (4) Sections, of which **Section 1: Information to the Applicants and the Contract Agreement in Section 4 must not be altered or modified under any circumstances.**

The Client addresses its specific needs through the **Section 2: Terms of Reference (TOR)**. The way in which an Applicant expresses his/her interest is by completion and submission of the Application Forms in **Section 3**.

Guidance notes in brackets and italics are provided for both the Client and the Applicants and as such the Client should carefully decide what notes need to remain and what other guidance notes might be required to assist the Applicant in preparing its Application submission; so as to minimize the inept Selection process.

SRFA (PS4), when properly completed will provide all the information that an Individual Consultant (National) needs in order to prepare and submit an Application. This should provide a sound basis on which the Client can fairly, transparently and accurately carry out an evaluation process on the application submitted by the Individual Consultant.

SRFA(PS4) duly tailored may also be used for the purpose of Single Source Selection Method. The following briefly describes the Section of SRFA (PS4) and how a Client should use these when preparing a particular request for Applications.

Section 1: Information to the Applicants

This Section provides relevant information to help Consultants prepare their Applications. Information is also provided for submission, opening, and evaluation of Applications and on the award of Contract.

This Section also contains the criteria for selection of suitable Applicant
The text of the clauses in this section shall not be modified.

Section 2. Terms of Reference

This section defines clearly the Objectives, Goals, and Scope of the assignment, and provides background information (including a list of existing relevant studies and basic data) to enable the Individual Consultant to clearly understand the assignment. This section lists the Services and surveys that may be necessary to carry out the assignment and the expected outputs (for example, reports, data, maps, surveys); it also clearly defines the Client's and Consultants' respective responsibilities.

Section 3. Application Forms

This section provides the standard format that permits the requested information to be presented in a clear, precise and readily available manner and allows the Client to readily understand and evaluate Applications in accordance with the pre-disclosed criteria. The completed forms will indicate details of the Applicant's qualifications and experience best suited to the specific assignment.

Section 4. Contract Agreement Forms

The Form of Contract Agreement which, once completed and signed by the Client and the Consultant clearly defines the Client's and Consultants' respective responsibilities. The Annexes to the formal Contract include a Description of the Services, the Reporting Schedule and **Cost estimates** of Services.

Background and General Description

Bangladesh Civil Registration and Vital Statistics (CRVS) program has been initiated by the government with the aim of saving the significant events of the citizen's life in the form of data through a single ID-management and ensuring all the services of the government based on it. In order to implement the global goal of "Get everyone in the picture", by identifying every citizen of the state, completing the registry of important events and information in his life such as: birth, death, etc. CRVS is the routine administrative process for generating Vital Statistics. In the light of CRVS regarding the collection, storage and use of educational information for the overall supervision, supervision and evaluation of the education system, the creation of a database containing all the information of teachers and students of secondary schools, madrasas, colleges, technical and vocational institutions and other post-primary educational institutions of the Ministry of Education, by providing unique IDs. It is necessary to introduce student tracking system and ensure use of ID number assigned to each student at all levels of education. Apart from this, a 10-digit unique ID is being provided after birth registration is completed within 45 days of the birth of a child, and citizens aged 18 or above are receiving all government services with a unique NID. But all the children who are between 1 to 17 years of age or who are studying from pre-primary to higher secondary level are left out of this unique ID system of the government. Under

this single ID management in the Govt., the Department of the Council of Ministers has entrusted the Directorate of Primary Education and the BANBEIS with the responsibility for inclusion of students studying from pre-primary level to class XII. The project was formulated by BANBEIS under the guidance of the Ministry of Education following the advice of the Cabinet Division. One of the important aspects of this method is to finalize and implement the software by including all additions and insertions related to data input, data transfer, application download and user authorization in the educational institution information management system.

In the current context of education information management, all organizations and departments including education, education institutions boards, BANBEIS, Directorate of Secondary and Higher Education, Directorate of Madrasa Education, Directorate of Technical Education have been collecting and using educational information on their own initiative. Each organization collects the same data separately at different times leading to waste of both time and money, and lack of an integrated platform for data review and analysis of students, teachers and institutions, resulting in lack of accurate data to support educational policy making. Besides, the DOS-based software Clipper/FoxPro/Visual Basic, introduced in 1994 for the processing and management of the examination results in the education boards, results in the processing of the examination results by the increasing number of students. Considering the situation described above, 2 departments in the Ministry of Education related to the collection, storage and use of educational information for the overall supervision, supervision and evaluation of the education system and the DSHE, NTRCA, Technical Education Directorate, Madrasa Education Directorate and all Education Boards under these and Aiming to implement a coordinated educational information management system in the education sector by coordinating the activities of BANBEIS The Establishment of Integrated Educational Information Management System (IEIMS) project was formulated under the guidance and supervision of the Ministry of Education and was approved on 14/08/2018 on the basis of the needs and opinions of all organizations.
